Concept

Forest Ecosystem in Protected Areas shows distribution of grasslands, the % of forest should be 33% and grasslands 7% , but recently grasslands areas are decreasing year by year due to invasion of woody species and invasive weeds. Herbivores require grasslands for grazing, breeding, nesting, hiding habitats for wild habitat management.

Grasses are annual, perennial, soft, coarse, palatable and non palatable. Grasslands are of three types smaller, intermediate and taller. Soil present in forest ecosystem determines composition of grasslands. Fodder value of grasses determined by chemicals, nutrients, fiber % before and after flowering. Grasslands development and management in Protected Areas like Tiger reserve, Sanctuary is important work and to train frontline staff is regular work from 2012.

To know the soil characters, texture , colour and water holding capacity

habited in the protected areas. The grasses are the producers, soil binders, provides chemical energy to the wildlife in the form of fodder species. The protected areas forest are with 2.0 to 4.5% grasses naturally it should be 6-7%. Now recently natural grasslands and relocated areas of the Protected Areas are developing in to good grasslands for the herbivores. Grasslands are the green ground cover of protected areas in forest. The grasses are useful for grazing habitat of wildlife (Herbivores).

The grassland management practices:

1. To give the field training to the forest field staff in the natural grasslands and relocated areas of the Protected Areas in each season of the year.
2. To know the exact area of grassland yearwise by demarcation of grassland area by GPS.
3. Grasses identification training to field staff by local names and scientific names.
4. Weeds identification with local names and their flowering season.
5. Browsing species identification with local names.
6. Field training to collect the grasses seeds and wild legumes seeds.
7. Weederadication program met two times in a year
8. Grasslands enrichment by seed broadcasting in May - June season.
9. Grasses biomass management practices in mosaic pattern.
10. Wild fruit trees identification and addition in relocated areas.
11. Complete training programmes are organized by the CCF & Field Director of the respective Tiger Reserves in each season.

The practices in the field

1. Grasses identification - October.
2. Weeds identification - August.

3. Wildleguminousplantsidentification–September.
4. Weedsuprootingthreetimesineachyear.
5. Grassesseedscollection–SeptembertoFebruary.
6. Wildlegumesseedscollection-November–December.
7. Grassesseedsadditioninselectedareasforgrasslanddevelopment.
8. Observationofgrasslands.
9. Toknowthecompositionofgrasslands.
10. Brushwoodmanagementtoreducewoodland.
11. Topreparegrasslandmanagementregister.

Every year, 8th March is observed as International Women's Day to celebrate the social, economic, cultural, and political achievements of women from all around the world. The day also focuses on a call to action for accelerating gender equality and setting agendas and goals in achieving these targets. The day is important because it not only gives an opportunity to reflect on how far we have come as women in society, but also to acknowledge how much more we need to do to achieve true gender equality. This International Women's Day, 8 March 2023, celebrating under the theme **DigitALL: Innovation and technology for gender equality**.

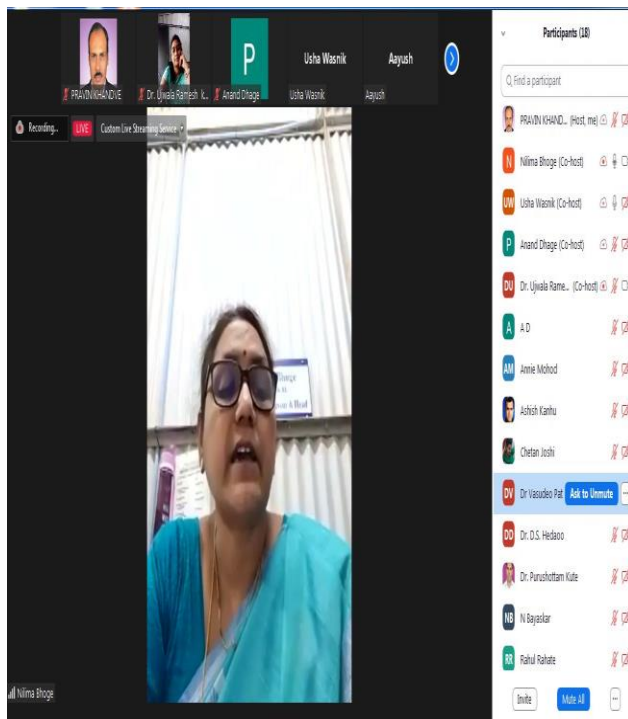

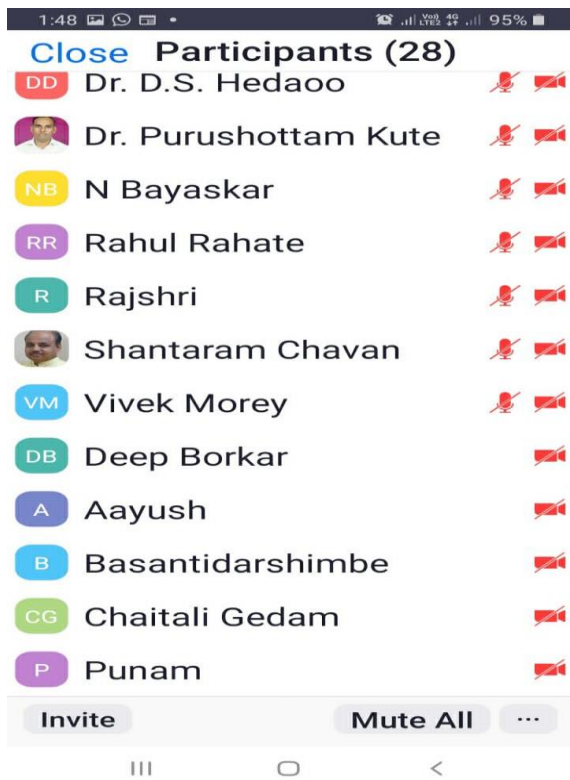

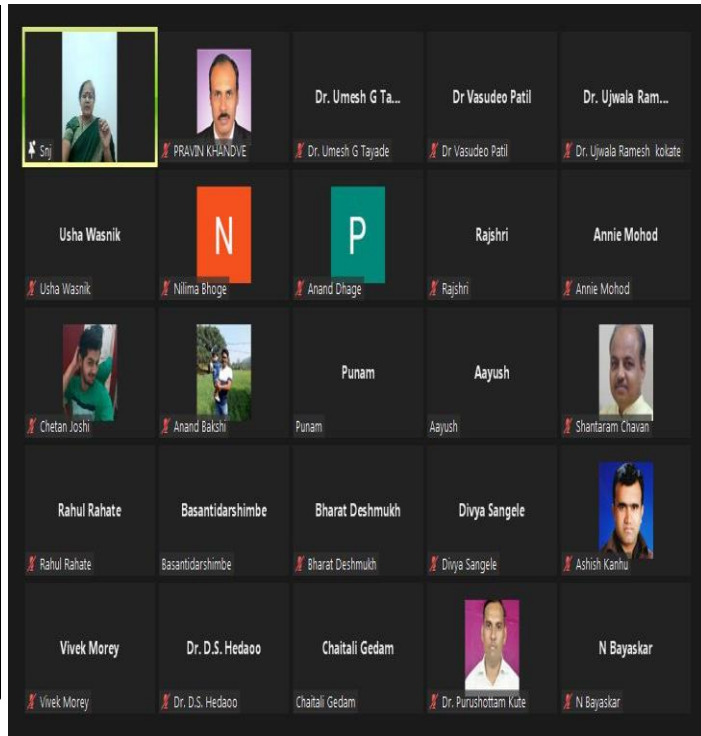

Dr. Sangita N. Jagtap, HOD, department of Hindi, ASCC college, Chikhaldara nicely explained the role of women in society. Women take the lead in helping the family, adjust to new realities and challenges. Women are the key to sustainable development and quality of life in the family. The lecture was very helpful to know about the importance of women's role.

Dr. U.S. Wasnik, HOD, Department of Chemistry and Coordinator of Women Development cell also talked about theme of International women's day. Dr. U.G. Tayde, HOD, department of English gave presidential speech. Dr. U.R. Kokate anchored the program and Dr. N.Y. Bhoge ended it by vote of thanks.

Plastic Free Environment

Title of the Activity: Plastic Free Environment
Date: 27th September 2022
Place: Seminar hall

Objectives of program:

1. To aware about polythene plastic bag pollution.
2. Making our environment an eco-friendly zone.

Number of beneficiaries : 42

Reference: MAHARASHTRA NON-BIODEGRADABLE GARBAGE (CONTROL) Act, 2006.
No.Plastic-2022/C.R.104/TC-1.— Notification, 2018 dated 23rd March, 2018,

Brief Report: Plastics do not undergo degradation, stays in the soil for many years, which affects soil fertility and degrades the soil quality. When plastic enter the drainage and sewerage system, it blocks the pipes and the drains causing water logging. The improperly disposed of food bags, when eaten by animals, cause stomach and intestine related diseases which even lead to suffocation and death. Plastic items find their way to the river and other water bodies, which are then swallowed by fish, seabirds, and other marine species. Proper disposal and usage of plastic discards can reduce these problems. A set of regulations should necessarily be followed to stop these problems.

In the academic session 2022-23 Department of Chemistry organized Extension Activity program for the students. The program conducted on 27th September 2022 in Seminar hall.

Mr. Rahul P. Rahate, Assistant Professor in Chemistry anchored the program. Dr. U. S. Wasnik, HOD in her speech gave brief introduction about the Extension activity of the department, addressed the students and insist students to avoid use of single use plastic. Shown ppt on plastic bag pollution. Aware the students about how plastic polythene bags polluted the air when plastic bags burn, it releases toxic substances into air causing air pollution, also the harmful effect of plastic bags on human beings, animals and the environment.

At the end of program all the students took oath that they not to use plastic bags and use only cotton bags & save earth. The program ended by vote of thanks.
