Title of the Activity: Plastic Free Environment

Reference: MAHARASHTRA NON-BIODEGRADABLE GARBAGE (CONTROL) Act, 2006.
No. Plastic-2022/C.R.104/TC-1.— Notification, 2018 dated 23rd March, 2018,

Brief Report: Plastics do not undergo degradation, stays in the soil for many years, which affects soil fertility and degrades the soil quality. When plastic enter the drainage and sewerage system, it blocks the pipes and the drains causing water logging. The improperly disposed of food bags, when eaten by animals, cause stomach and intestine related diseases which even lead to suffocation and death. Plastic items find their way to the river and other water bodies, which are then swallowed by fish, seabirds, and other marine species. Proper disposal and usage of plastic discards can reduce these problems. A set of regulations should necessarily be followed to stop these problems.

In the academic session 2022-23 Department of Chemistry organized Extension Activity program for the students. The program conducted on 27th September 2022 in Seminar hall.

Mr. Rahul P. Rahate, Assistant Professor in Chemistry anchored the program. Dr. U. S. Wasnik, HOD in her speech gave brief introduction about the Extension activity of the department, addressed the students and insist students to avoid use of single use plastic. Shown ppt on plastic bag pollution. Aware the students about how plastic polythene bags polluted the air when plastic bags burn, it releases toxic substances into air causing air pollution, also the harmful effect of plastic bags on human beings, animals and the environment.

At the end of program all the students took oath that they not to use plastic bags and use only cotton bags & save earth. The program ended by vote of thanks.
