Amravati, Mobile No.9975019371, bhagwatsatishs@gmail.com.

### Abstract:

Maharashtra is a very big state in India. Maharashtra literally means the "Great State" or "Great Nation". ... Known for its amazing natural beauty and rich cultural heritage, Maharashtra is one of the most industrialized states of India. Some of the prime cities of Maharashtra include Mumbai, Pune, Nashik, Shirdi, and Kolhapur. With the Arabian Sea on its western coast and the Sahyadri mountains running through it, Maharashtra is naturally beautiful. From quiet, white-sand beach towns with ancient temples, to green pollution-free hill stations, here is a list of eight of the most beautiful towns in Maharashtra. It's not the language of money alone that makes Maharashtra rich. When the western state speaks, it does so in 38 different tongues and more, making it one of the most linguistically wealthy places, according to a recent language survey. Maharashtra state is made up of 35 districts, which are grouped into six divisions.

Researcher had curiosity to know about school sports in Maharashtra for getting good performances and player's developments. To see the important are the factors of infrastructure and financial support to sports, study was under taken.

### Introduction:

Maharashtra is a very big state in India. Maharashtra literally means the "Great State" or

"Great Nation". ... Known for its amazing natural beauty and rich cultural heritage, Maharashtra is one of the most industrialized states of India. Some of the prime cities of Maharashtra include Mumbai, Pune, Nagpur, Nashik, Shirdi, and Kolhapur. With the Arabian Sea on its western coast and the Sahyadri mountains running through it, Maharashtra is naturally beautiful. From quiet, white-sand beach towns with ancient temples, to green pollution-free hill stations, here is a list of eight of the most beautiful towns in Maharashtra. It's not the language of money alone that makes Maharashtra rich. When the western state speaks, it does so in 38 different tongues and more, making it one of the most linguistically wealthy places, according to a recent language survey. Maharashtra state is made up of 35 districts, which are grouped into six divisions. Amravati Division: Akola, Amravati, Buldhana, Washim and Yavatmal Aurangabad Division (Marathwada): Aurangabad, Beed, Hingoli, Jalna, Latur, Nanded, Osmanabad and Parbhani, Konkan Division: Mumbai City, Mumbai Suburban, Raigad, Ratnagiri, Sindhudurg and Thane, Nashik Division: Ahmednagar, Dhule, Jalgaon, Nandurbar and Nashik, Nagpur Division: Bhandara, Chandrapur, Gadchiroli, Gondiya, Nagpur and Wardha, Pune Division: Kolhapur, Pune, Sangli, Satara and Solapur. Maharashtra, cricket is considered the most popular sport, but Kabaddi, field hockey, Kho Kho, badminton, and table tennis are also widely played. In the state's rural regions, wrestling championships such as Hind

**Conclusion:**

On the basis of findings and within the limitation of present study it is observed from the literature reviews and reports was found that school management cannot afford to take part in school sports due to financial issues. No grants from government are given to school authorities. Extra money at the time of admission cannot be taken from parents. The picture of infrastructural facilities is poor in the schools due to same kind of problems. Money is not available for maximum of the schools for sports. Parents show apathy to send their ward to take part in sports. Moreover Games are played at low levels like Taluka, District, Division, State and National where it becomes difficult for schools to secure money at every stage. So it becomes a dream for players to reach up to highest level. Hence the infrastructure and financial importance is given to get splendid results in school sports.

**Recommendations:**

- Government should sanction grants for every stage of participations.
- Government should provide big grants for

- sports infrastructure development.
- (03) Management should invest money and give utmost importance to sports and provide facilities on their own.
- (04) Government should make compulsory for all school to take part in all school games.
